

The metal protective guard is a heavy duty metal protective guard to help protect against abrasive damage, theft and vandalism to the transmitters. This is an added preventative in addition to the product enclosure.

It is made from 16-gauge galvanized steel and has ½" square openings in the front to allow gas and air to flow through to the sensor. With only four slotted mounting holes, installation and removal for gas detector servicing is easy.

KEY FEATURES

- » 16 gauge, clear anodized metal protective guards
- » Large size for self-contained systems
- » Easy installation

APPLICATIONS

- » Residential Buildings
- » Commercial Buildings
- » Hospitals
- » Laboratories
- » Research Facilities
- » Parking Garages
- » ... and many more
